# Raptool Retail

## The Platform

The mobile software solution for retail that is ready to use, out of the box. Raptool Retail can also be customized to your specific needs, without programming. The most common store mobility functions are ready to be uploaded to a Windows Mobile or Windows CE device. Easy to integrate with most: ERP, POS, and other systems.

The image shows a screenshot of the Raptool Retail POS software interface. At the top, there is a red header bar with a white 'X' icon. Below it, a dark grey bar displays the text 'Employee NO:' in white, followed by '1002' in a large, bold, light grey font. Underneath this, another dark grey bar displays 'Bert Bertsson' in white and 'Code: 1234' in white. At the bottom, a green bar displays the text 'Raptool Retail' in white. To the right of the main content area, there is a grid of six colored buttons arranged in two rows of three. The colors are red, blue, and green. The buttons are labeled as follows: Row 1: 'Logout' (blue), 'Order' (blue), 'Print' (green). Row 2: 'Price' (green), 'Inventory' (red), 'Receiving' (red).

**Log in**  
Create profiles to block access to some functions. Create a separate user file if your system does not support it.

**Start menu**  
Change user, Place  
Order, Change  
product price, Print  
shelf labels,  
Inventory Count,  
Receiving goods

Price change

Order QTY	3

**Order**  
Order products to  
the store. See current  
orders for the  
product. Customize  
with size, package  
OTY, weight etc.

**Order List**  
See the products you have selected to order. Customization example: Orders can be separated, one for each distributor.

## Customize

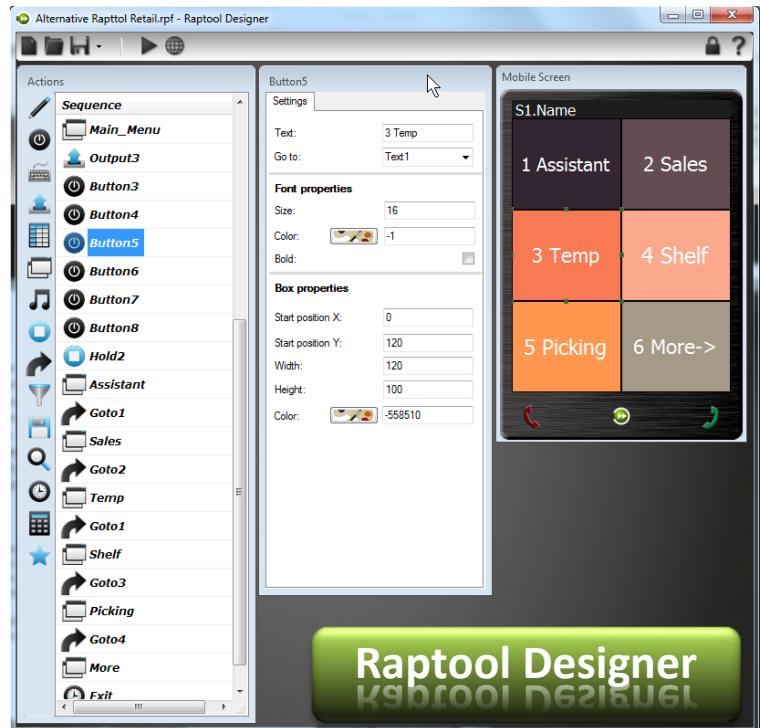

Your stores are unique. With the Raptool Designer we can customize your Raptool Retail solution to fit your needs. **Anything** can be changed and new functionality can be added very short time.

The easy to use, click interface requires NO PROGRAMMING, saving time and money.

## Integrate

Data from your POS and other systems can be integrated to your Raptool Retail solution. The data generated in the mobile devices is sent back into the POS system.

Communicate online through Wi-Fi or 3G or work off line, docking the mobile device to sync.

## Raptool Retail add-on modules

### Mobile Store Assistant

Store personnel running back and forth to a fixed terminal to help customers wastes time. With a Mobile device, this time can be spent selling products to customers. Some customers leave when the store sales personnel run off to a terminal, making you lose business.

The Raptool Retail Mobile Sales Assistant adds functionality like: Is the product in stock? In the right size? Is there a similar product in stock? Is the right product in the right size in a nearby store? Book it for the customer in that store! Order the product to your store for the customer. When will it be in stock? Take the contact info and call the customer when it is in. You can even allow your sales people to make price mark downs directly in the mobile terminal. Ad manager's approval if desired.

### Mobile Shelf Placement

Shoe and clothing store sales personnel use allot of time looking for the right size in the back end stock. With Mobile Shelf Finder you scan the barcode of the product the customer is interested in, enter the size and you directly see if it is in stock (green square) and where in the stock you can find it. Alternatively the store personnel scan the product barcode and send a picking order to the personnel in the back end stock that come out with the product to the store. If your POS system does not support shelves, Raptool can add that functionality separately.

**Store Sales.** Shop with the customer and add products to his receipt.

**Temperature.** When freezers temperature levels need to be checked.

**Picking.** Have a web shop? Pick the goods in the store or warehouse.
